

Hymann

Hydraulic technology

MASTIC DISPENSER

Ref. HY-MD-016.029

General Characteristics

Mastic dispenser is a equipment designed to carry out the dosing of abrasive fluids and with high viscosity, incorporating parts by additive manufacture (specifically EBM technology) that allow to optimize the precision in its application. It is controlled online by The operators of the company in which it is installed, without the need to manipulate the tool.

Technical Specifications

Volume	1000 cc
Maximum operating pressure	250 BAR
Maximun temperature	35°C
Working fluid	High viscosity and abrasive fluids

Material

Cylinder liner	Stainless Steel
Pneumatic cylinder	Aluminum
