

Hydraulic technology

General Characteristics

The HYMANN HY-SEPV products are hydraulic valves with clase fitting designed for high viscosity working fluids.

Technichal Specifications

Inlet diameter	1 1/2"
Outlet diameter	1 1/2"
External dimensions	High: 543 mm; Width: 125 mm
Nominal pressure	10 bar
Range of working temperature	-10 °C a 80 °C
Working fluid	High viscosity fluids
Fluid maximum speed	3 m/s

Material

Valve body	Inox. AISI 440C
